DataMap v22.0.0 Release Notes

This document is an overview of updates in DataMap v22.0.0.

Included in this release:

- Enhancements
- Resolved Issues

The new Learning Center has launched! To access this resource, log in to ProgressBook and click ? (Help icon) in the top-right on any screen.

Enhancements

Analysis

- On the **Multiple Measures** screen, the **Non State Assessments** filter has been added. You can now search multiple years for **Non State Assessments** and search for both **State Assessments** and **Non State Assessments**. You can select a maximum of three years in the **School Years** filter in each filter.

Resolved Issues

Import Assessment Scores

- (PBSIS-18548) Previously, files imported from Star Renaissance did not include the **Unified Scale Score**. Now, DataMap correctly identifies the **Unified Scale** column in the import file and imports the **Unified Scale Score**. The **Unified Scale Score** displays on the **Student Roadmap** in the **DataPoints History** section. To view the **Unified Scale Score** on the **Student Roadmap** for past imports, districts need to re-import past files.
- (PBSIS-17261) System performance on the **Match Students** screen has been improved and student matching now runs faster.
