Resolved Issues

StudentInformation

DataMap EMIS Import

- (D14306) Previously, after importing program codes and then adding additional program codes to a RIMP in DataMap, when you tried to import the new program codes into StudentInformation, an error occurred. Now, in these circumstances, no errors occur and the import is successful.

EZ Query EZ Students

- (D2630) Previously, when you changed the student's **Attendance Calendar** on the **Edit Student Profile** screen, the **Attendance** screen displayed attendance data only from the date of the calendar change and not for the entire school year. Now, the screen always displays attendance data for the entire school year.

Student Absence Intervention

- (D14395) Previously, in some circumstances, the **Trusted District Attendance** tab did not display when a district trust was enabled. Now, the tab always displays when a district trust is enabled.

StateReporting

Assessment Extract

- (D13418) Previously, the **Assessment Extract** did not include the **Progress** field value for Preschool COS Assessment records. Now, it correctly includes the **Progress** field.
- (D13499) Previously, the **Assessment Extract** included the incorrect score value for CTE Industry Credential assessment records. Now, the correct scores are included.

- (D13418) Previously, the **Assessment Extract** import did not include the **Progress** field value for Preschool COS Assessment records. Now, it correctly includes the **Progress** field.
- (D13499) Previously, the **Assessment Extract** import did not import the correct score values for CTE Industry Credential assessment records. Now, the correct score values are imported.

District and Building Information

- (D14321) Previously, when you added or edited an existing record, selected the **Participating in Physical Education Pilot Program** checkbox and saved, when you reloaded the record, the checkbox did not display as selected but the correct attribute for this checkbox was still included in the EMIS transfer file. Now, the checkbox displays as selected after saving, and you can deselect the checkbox if desired.

- (D14321) Previously, when nothing was entered in a field within the **PE Performance Measures** section, 0 was incorrectly reported in the EMIS transfer file instead of blank. Now, when a field is blank, no attribute is reported in the EMIS transfer file.

DPR Growth

- (D14430) Previously, when you tried to manually add a DPR Growth (MAP) assessment and selected an **Assessment Date** in December, you received an error message. Now, you can add assessments with an **Assessment Date** that falls between August 1st and June 15th.

Special Education Import (SpS)

- (D11574) Previously, when you ran the **Student Program (GQ)** import with Program (Membership) records that contained start and/or stop dates whose range occurred on the end of February in a leap year, you received an error. Resolved Issues

Student Information

Automatic Marks

- (D12982) Previously, when a student had a pending-withdrawal alert, even when the alert was in a previous school year, automatic marks did not calculate for the student. Now, automatic marks are calculated for students with pending-withdrawal alerts.

District Switcher

- (D14551) Previously, when you logged in to an account with District A in context and then logged into a different account with District B in context, the district switcher correctly displayed District B but District A students were incorrectly returned when you performed a student search (even if the account accessing District B did not have access to District A). Now, in these circumstances, students from only District B are returned in a student search.

Graduation Points

- (D14425) Previously, the following industry credential assessment codes did not display for the **Arts and Communication** assessment area:
 - CA54 - Adobe Certified Associate Graphic Design & Illustration Using Adobe Illustrator
 - CA56 - Adobe Certified Associate Print & Digital Media Publication Using Adobe InDesign

Now, these assessment codes correctly display for the **Arts and Communication** assessment area.

Home School Import

- (D12328) Previously, on the **Imported Marks History** tab,  did not function properly. Now, a window opens with a mapping grid for the import.

Pre-Ident for KRA Export

- (D14572) Previously, when schools had staggered start times for kindergarten and their course section assignment start date was not the same as the first day of the master calendar, students were not included in the Enrollment file. Now, in these circumstances, the students are included as long as they are enrolled in a class with the appropriate subject codes and have not been withdrawn prior to November 1st.

Student Bulk Enrollment

- (D14301) Previously, when you ran the student bulk enrollment process to promote students to the next grade level, whether or not the promotion was to the same school building, students with transportation records in FY19 did not have all fields copied into FY20. Now, in these circumstances, all transportation records are copied into FY20.

Student Scheduled with Free Time (R415-A)

- (D14531) Previously, when a non-resident student's **District of Residence IRN** matched one or more schools within a district and the student had no assignments, the report printed **Rotation Days** as MMTTWWRRFF or MMMTTTWWRRRRFFF. Now, in these circumstances, the report correctly prints **Rotation Days** as MTWRF.

Student Scheduled with Free Time by Period (R415-B)

- (D14531) Previously, when a non-resident student's **District of Residence IRN** matched one or more schools within a district and the student had no assignments, the report printed **Rotation Days** as MMTTWWRRFF or MMMTTTWWRRRRFFF. StateReporting

Calendar Collection Transfer

- (D14498) Previously, due to updates to ODE requirements, after you ran the **Transfer - Building and Grade Calendar (DN/DL)** process for FY20 and submitted the file to ODE, an error occurred. Now, you must select a value of **Hours** or **Days** in the new **Calendar Type** section on the **District and Building Information** screen **District Organization Info (DN)** tab before running the process. ([ProgressBook StudentInformation EMIS Guide](#))

Student Reporting - Period (S)

- (D14417) Previously, when a student changed grade levels during the school year, the **Transfer - Student Discipline (GD)** process included an incorrect value for the **PS-03 Discipline Reason Detail**. Now, the correct value is included.
- (D14417) Previously, when a student changed grade levels during the school year, the **Verify - Discipline (DISCEMIS)** process did not account for this change when checking for errors, which resulted in the inclusion of incorrect values in the **Transfer - Student Discipline (GD)** process. Now, the process compares the discipline incident date to the start and end dates on the student's FD-Attributes records to determine whether the student was in 3rd grade at the time of the incident. If the student was in 4th grade on the incident date and the **PS-03 Discipline Reason Detail** field is a value other than *, the DS20E error displays.

Graduate Reporting - Period (G)

- (D14476) Previously, when multiple buildings in a district shared the same IRN, the **Transfer - Student Program (GQ)** process failed. Now, the process runs successfully.

Preschool ELA

- (D14533) After the release of v19.0.0, the columns and column headers for entered assessments displayed incorrectly. Now, the grid displays the information correctly.

Now, in these circumstances, the report correctly indicates that the student's request is assigned.

StateReporting

Student Profile Bulk Update

- (D14628) Previously, when the **Satellite Student** checkbox was selected, the **Student Profile Bulk Update** process did not update the checkbox for students whose second FS record should have been updated. Now, in these circumstances, the process correctly updates the **Satellite Student** checkbox.

Course Requests Mass Update Rules

- (D13373) Previously, when Building A and Building B within a district had the same grade levels, when course requests mass-update rules were created for students in Building A, course requests were also incorrectly added for students in Building B when you executed the rule group. Now, in these circumstances, course requests are created only for students in Building A.

StateReporting

District and Building Information

- (D14540) Previously, on the **Building Organization Info (DN)** tab, the **Number of months the building has been in the reported stage of PBIS Implementation** field accepted only values of only 1-99. Now, the field accepts values of 0-99 so that 0 can be correctly included in the **Transfer - Organization -- General Information (DN)** process.

SpecialServices EMIS Extract

- (D14809) Previously, the extract did not create all necessary GE Event records for students, which resulted in missing records after the file was processed. Now, the extract correctly includes all GE Event records for students.

Graduation Points

- (D14416,14970) Previously, when a student had the graduation exemption for **Career-Technical Pathway** and/or **Advanced Math** selected on the **Student Exemptions/Requirements** screen, their progress for Mathematics did not display as **Complete** when the student had enough credits to meet the requirement. - (D15143) Previously, when you ran the school year initialization **Scheduling: Courses** task at the building level, each course's **General** tab **NCAA Core Course** checkbox selection and **Marks** tab **College Credit Hours**, **CCP Location IRN**, and **College Location** fields were not copied into the next school year. Now, in this circumstance, the values correctly copy into the next school year.

- (D15143) Previously, when you ran the school year initialization **Scheduling: Schedule** task at the building level, each course section's **EMIS Override** tab **Location IRN** and **Location Name** fields were not copied into the next school year. - (D14041) Previously, when you ran the **KRA** assessment import with a file that included students with no assessment results, and then you navigated to the **Assessment Import History** screen and clicked  to view unmatched data, an error occurred.  - They were enrolled after the test window in the prior school year.
 - They came from a non-public school district or were homeschooled.
 Now, in these circumstances, the retained students are correctly included in the process.

Now, in these circumstances, you no longer receive the error and the process runs successfully.

- (E15240) Due to new ODE requirements, on the **Building Organization Info (DN)** tab, in the **Positive Behavior Implementation Status** section, the **Number of months the building has been in the reported stage of PBIS Implementation** field now has a valid range of 0-999.

SpecialServices EMIS Extract

- After the release of ProgressBook Suite v19.5.0, due to new reporting requirements from ODE, a script was applied to exclude event data from Preschool-to-Kindergarten Transition IEPs in the EMIS extract for GE and GQ records so that districts could manually submit the correct data to ODE. As the **Special Education Events** form for the IEP now accommodates the new reporting requirements, the changes made by the script are removed in ProgressBook Suite v19.6.0. and the EMIS extract now includes the correct GE and GQ records (see the *ProgressBook SpecialServices v19.6.0 Release Notes*).

Student Reporting - Collection (S)

- Due to new ODE requirements, the **Transfer - Organization - General Information (DN)** process now includes 3 new attributes for records saved with a date within the current school year on the **District and Building Information** screen **District Organization Info (DN)** tab **Assessment Group** section.

JVS Integration

- (D15059) Previously, when you ran the JVS Integration process, when a course section assignment was dropped at the home school satellite building (excluding student withdrawals from the home school), the course section assignment stop date was not updated in the JVS clone building. Now, in these circumstances, the stop date at the JVS clone building is updated correctly.

StateReporting

Assessment Imports

- (D15356) Previously, when you ran the **ODDEX File** import with PS ELA records, any records with a **Score Not Reported** value of * were incorrectly imported as **N/A**. Now, in this circumstance, records with **Score Not Reported** values of * are imported correctly.

Assessment Reporting - Collection (A)

- (D15334) Previously, the **Transfer - KRA (GO)** process excluded some retained students in some circumstances. Now, the process includes records for all retained students.

SpecialServices EMIS Extract

- (D15304,15313) Previously, when you created an EMIS extract that included GQ records, in the associated error log file, an error message incorrectly displayed for all AIEPs with service start dates that fell before the amended effective start dates for those AIEPs. Now, in this circumstance, an error message does not display for these AIEPs.

Staff/Course Reporting - Collection (L)

- (D15332) Previously, when you ran the **Verify/Update - Course and Class List (CLISEMIS/CTRMEMIS)** process, when alternate term dates were not specified on the **EMIS Term Dates** screen, incorrect start dates were included for students who enrolled in a course section after the course section start date, and incorrect end dates were included for students who dropped a course section before the natural course term end date. Now, in these circumstances, the process considers the start and stop dates on the **EMIS Term Dates** screen, **Course Section** screen **EMIS Override** tab, and the **Reporting Term Maintenance** screen in respective order to determine the correct dates.
